G.A. VAS

Min.. System Requirements
- OS: Windows XP, Vista & 7
- CPU: Pentium4, 800MHz
- RAM: 256MB
- Free space: 2GB
- DV Camera
- IEEE1394 Port (Firewire)
- Firewire Cable
- CD-ROM Drive

G.A. VAS
VIDEO ANALYSIS
SOFTWARE

TECHNOLOGY

G.A. VAS is a Digital Video (DV) golf analysis software program that integrates seamlessly with both the GA II and GA Sim, combining the statistics of launch monitor technology with the images of Digital Video Analysis. The fundamental strength of G.A. VAS is its ability to link both the G.A. VAS images with GolfAchiever swing statistics. G.A. VAS combines the two files into one, allowing you to not only "see" the swing, which is where traditional video analysis programs end, but also evaluate based on statistics. Not to mention, G.A. VAS' easy to use playback controls and drawing features make GolfAchiever the most usable and complete teaching-clubfitting system available.
FEATURES & BENEFITS

> Video Saved with Launch Monitor Data
> Quantify Student Progress
> Simple, Friendly Software
> Quick Toggle to G.A. Launch Monitor
   Software
> Side by Side Compare
> Interactive Drawing Tools
> Intuitive Playback Controls
> Auto Capture and Replay

> 8 Key Frames
> Print Outs with Launch Monitor Data
   - Key Frame Booklet
   - Side by Side Compare
   - Individual Frame
> Corporate Events and Entertainment
> Hands Free Teaching and Data
> Data Enforces Club Purchase Decisions
> Total Teaching-Clubfitting Solution
   From Single Source
